

Solar panels installed on the roof of the Maputo factory

Overview

Can solar panels be installed on a factory roof?

The roofs of factories are often the ideal place to install solar panels. As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it.

What is a rooftop solar system?

In rooftop solar systems, solar panels are mounted on the roof of the building. In contrast, ground-mounted solar projects use large open land space for the mounting panels. In open-access systems, solar power gets produced at state-owned solar farms and then transmitted through the utility grid.

Where can solar power plants be installed?

Industrial units such as manufacturing facilities and warehouses have a major space advantage. Due to this factor, businesses can choose to install either rooftop solar power plants or ground-mounted solar projects in their factories. In rooftop solar systems, solar panels are mounted on the roof of the building.
