

# **Solar power generation 36kw inverter**

## Overview

---

What is a 36kw inverter?

The 36kW is an extension of the existing 23kW and 28kW inverter line and features a dual MPPT design with up to 98.6% conversion efficiency and wide operating window of 240-950Vdc. An installer friendly and integrated wire box simplifies installation and reduces BoS costs.

What is a 36 volt inverter?

Looking for a 36 V inverter is often harder than finding a 12 V or 24V inverter since they are less common. Although not used as often, they still serve important roles in mid-range power applications. All of these higher-voltage systems should be used when powering equipment that draws over 3,000 W. Higher voltage is important for several reasons.

What is a Growatt 3 phase grid-tie inverter?

The Growatt 36kW Three Phase Grid-Tie Inverter offers 98.8% efficiency, 3 MPPTs, local WiFi, and an OLED display—ideal for large-scale grid-tie solar systems.

Can a 35kW solar array be put on an inverter?

A 35kW solar array can be put with an inverter with an AC output of 26.25kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.
