

Solar power station energy storage 5MWH liquid cooling

Overview

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

What is a 5 MWh battery storage system?

The system also features a DC voltage range of 1,081.6 V to 1,497.6 V. From ESS News China-based rolling stock manufacturer CRRC has launched a 5 MWh battery storage system that uses liquid cooling for thermal management.

How does a 5MWh liquid cooling system work?

In terms of temperature control, the 5MWh liquid cooling platform relies on its variable frequency liquid cooling system to make heat dissipation more uniform, thereby achieving higher heat dissipation efficiency and keeping the system temperature difference $<4^{\circ}\text{C}$.

What is Mercury Max 5MWh liquid cooled container?

Mercury MAX 5MWh liquid-cooled container adopts the 1P104S large PACK solution, which increases the energy density by about 20%, effectively optimizing the production process and saving costs; the compact design and reasonable matching of the power of the hydrothermal system can further improve the energy density of the energy storage system.
