

Solar power station for home in America

Overview

Should you buy a power station or solar generator for home backup?

One of the most common reasons people purchase a power station or solar generator for home backup is to ensure everything in their refrigerator stays cool. However, refrigerators have unique power needs compared to other electronics, so it's essential you double-check your unit's requirements before making a final purchase.

Is a 100W solar power station a good choice?

A new compact power station by an upcoming brand with bigtime battery experience. Our favorite aspect is the fast AC charging combined with >20ms UPS transfer time. The 100W solar charging matches the top brands. Although testing is limited and brand recognition still has a long way to come, this may be a real contender.

What is a portable power station?

A solar generator is a portable power station that supports solar panel input. They are often used interchangeably, but not all power stations come with solar panels. How long does a portable power station last during an outage?

Run time depends on capacity and load.

What is the difference between a power station and a solar generator?

A portable power station is a battery-powered device that stores energy and provides AC and DC output. A solar generator is essentially the same thing, but includes or supports solar panels for off-grid recharging. Note: Not all power stations are solar generators, but all solar generators are power stations with solar capability.
