

Solar power system batteries in Sweden

Overview

How many home batteries are there in Sweden?

As of June this year, Svensk Solenergi estimated there is between 70,000 and 80,000 home batteries in Sweden, compared to around 265,000 solar systems under 20 kW in size, leaving around 70% of home solar owners currently without a battery installation.

How important is the battery storage industry in Sweden?

The Battery Storage industry in Sweden presents several key considerations for those researching companies in this field. First, regulatory frameworks are crucial, as Sweden's commitment to sustainability and renewable energy mandates compliance with strict environmental standards.

What happened to solar power in Sweden in 2024?

The expansion of PV systems in Sweden slowed in 2024 compared to the previous year. At the same time, investment in battery storage increased significantly. 2023 was an extreme year for solar power in Sweden, with a turbulent European energy crisis creating a unique interest in PV. In 2024, installations returned to the level of 2022.

Why should you invest in batteries in Sweden?

Batteries enable the phasing out of fossil fuels and increase flexibility in the electricity system through energy storage. The Swedish battery industry is at the forefront. Sweden also has related strengths and opportunities in areas such as vehicles and electrical systems, as well as a strong mining cluster.
