

Solar power with grid backup in Czech-Republic

Overview

How many solar power plants did Czechia build in 2023?

Czechia built around 1 GW of new PV plants in 2023, according to data from the Czech Solar Association (Solární Asociace). In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022.

How many solar power plants are there in Czechia?

In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022. The figures mark a period of rapid growth in Czechia's solar market.

Why is the solar market growing in Czechia?

The figures mark a period of rapid growth in Czechia's solar market. The growth has been largely driven by residential PV, with most of the new installations (80,069) being domestic PV plants, supported by the country investing an additional CZK 55 billion (\$2.5 billion) in its New Green Savings program back in March 2023.

Does Czechia need more energy storage capacity in 2023?

Czechia registered strong PV capacity growth in 2023, driven by a surge in residential installations. The nation's PV association says it expects a shift toward larger power plants in the coming year, but notes the need for more energy storage capacity.
