

Somalia Energy Storage Power Station Subsidy

Overview

Does Somalia have solar energy?

Solar Energy: Somalia has high renewable energy potential. Solar power could generate an excess of 2,000 kWh if the country reached its full capacity. Recently there has been progress in developing solar energy systems in the country by private sector electricity companies.

How much does electricity cost in Somalia?

Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa. Somalia has higher tariffs than neighboring countries Kenya and Ethiopia, ranging from 50-125 cents/kWh compared to 0.15 cents/kWh in Kenya and 0.6 cents/kWh in Ethiopia. Somalia's energy sector is considered promising for growth and investment.

How many people in Somalia have access to electricity?

While variations exist between rural and urban areas, in 2023 the Somali Household Budget survey estimated more than half of the population (61.9 percent) had access to electricity, demonstrating progress on the expansion of electricity services in the country.

Which companies provide off-grid solar energy solutions in Somalia?

In addition, several other companies exist that provide off-grid solar energy solutions, including Blue Sky, Solargen, Delta, and others. Financing represents the biggest obstacle to Somalia realizing its potential as a hub for renewable energy. International development partners are providing support in the solar energy sector.
