

# Standard Energy Storage Container

## Overview

---

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a containerized battery energy storage system?

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly deployable, reducing installation time and minimizing disruption.

What size battery energy storage container do I Need?

From small 20ft units powering factories and EV charging stations, to large 40ft containers stabilizing microgrids or utility loads, the right battery energy storage container size can make a big difference.

How do I choose a containerized energy storage system?

The most common standards are: Choosing between these sizes depends on project needs, available space, and future scalability. Regardless of format, each containerized energy storage system includes key components such as battery racks, BMS, EMS, cooling, and fire protection.
