

Stockholm Energy Storage Equipment BESS Company

Overview

How many large-scale battery storage systems are there in Sweden?

14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region. Developer and optimiser Ingrid Capacity and energy storage owner-operator BW ESS have been working in partnership to deliver 14 large-scale BESS projects throughout Sweden's grid, situated in electricity price areas SE3 and SE4.

Where is Bess located?

The BESS will be in Borup in the municipality of Hillerod on Zealand and will be the first of many more BESS projects for the company. It is adding BESS to solar projects it has already been developing and the total energy storage capacity planned is close to 1GWh, across 25 sites.

Why is Bess important in Sweden?

Sweden's renewable energy sector continues to expand rapidly. In 2018, solar and wind energy accounted for just 13% of total electricity consumption, but this figure is projected to reach 40% by 2025. This shift significantly increases the value of energy flexibility, making BESS essential for balancing energy supply and demand.

Which companies are launching Bess projects in the Nordics & the Baltics?

News from the Nordics and the Baltics, with BESS projects launched in Sweden, Denmark and Latvia by Centrica, Nordic Solar and Niam Infrastructure and Evecon. UK-headquartered utility Centrica has acquired a 100MW battery energy storage system (BESS) portfolio in Sweden from Swiss developer and independent power producer (IPP) Fu-Gen AG.
