

Sunroom greenhouse solar power generation glass

Overview

What is a glass-integrated solar cell?

AGC manufactures glass-integrated solar cells that can also be used as glass building materials. In this issue, we take a closer look at how "power generation with glass" works. Question 1 What are "glass-integrated solar cells" Glass-integrated solar cells are glass that can generate solar power in addition to basic glass functions.

What is sunjoule glass?

Sunjoule contributes to the enhancement of the value of buildings and structures as a glass that pursues high design and functionality, thanks to a degree of freedom that has never before been available in solar cells. Power generation with glass. AGC's SUNJUR®.

What is a greenhouse integrated PV (gipv) module?

Get in touch! Traditional greenhouses rely on external fossil fuel derived energy sources to power lighting, heating and forced cooling. Specially designed BiPV solar glass modules for greenhouses, Heliene's Greenhouse Integrated PV (GiPV) modules offer a sustainable alternative with no additional racking or support required.

What is solar glass & how does it work?

Photovoltaic cells embedded in the glass capture solar energy and convert it into electricity. A sleek and attractive alternative to solar panels, this ingenious energy-creating glass is part of the building rather than an attachment - a beautiful way to let the outside in and create clean energy at the same time.
