

Swiss Smart Energy Storage Solutions Company

Overview

Which energy storage projects have been commissioned in Switzerland?

Axpo commissioned its BESS in February this year while utility Thurplus commissioned a 3MW system in September last year. But Switzerland was the location for one of the largest energy storage projects commissioned in recent years, a 20GWh pumped hydro energy storage (PHES) unit which started operations in June 2022 in the Canton of Valais.

Is MW storage the country's largest battery storage project?

MW Storage is a developer of BESS projects which is also active in the German market, with a 100MW/200MWh project underway that it claimed is the country's largest. What is smart energy link?

Smart Energy Link (SEL) is a software developer and service provider for captive power solutions in residential and commercial buildings and quarters. SEL lowers energy costs, simplifies accounting of service charges and reduces investment for public power supply.

Why do we need Smart Storage?

Smart. Effective. Integrated. Energy is increasingly delivered on demand. That's why we have to store it when we don't need it, release it during peak consumption, and balance its generation across the grid. CSEM is creating smart storage technologies to tackle the main challenges of battery technologies: charging time, lifespan and range.
