

# Tallinn Energy Storage Financing BESS Price

## Overview

---

Baltic Storage Platform (BSP) has secured what it claimed is a first-of-its-kind €86.5 million (US\$100 million) financing for two large-scale battery energy storage system (BESS) projects totalling 200MW/400MWh in Estonia. What is a battery energy storage system (BESS)?

The role of battery energy storage systems (BESS) has become increasingly critical in stabilizing power grids and optimizing energy usage as part of the ongoing energy transition. With the integration of renewable energy sources such as wind and solar, the demand for efficient energy storage solutions continues to rise.

Is Bess financing based on a corporate balance sheet?

A few years ago, BESS financing was mostly reliant on corporate balance sheets or subsidies. Today, we are seeing non-recourse project finance for 600+ MW portfolios, mezzanine debt entering the capital stack, and public banks co-financing with private lenders.

How are Bess projects financed?

Today, we are seeing non-recourse project finance for 600+ MW portfolios, mezzanine debt entering the capital stack, and public banks co-financing with private lenders. For developers, asset managers, and financiers alike, this is a call to sophisticate how BESS projects are packaged and financed.

Is floor pricing a good option for Bess financing?

The floor pricing model has recently gained significant traction as an attractive option for BESS financing. In this model, an agreed floor is set between a third-party financier and the asset owner, typically structured as a fixed-for-floating swap.
