

# Thailand Chiang Mai energy storage export

## Overview

---

Are there grid-scale energy storage projects in Thailand?

There are currently few grid-scale energy storage projects in Thailand, although the situation is likely to change. In furtherance of its commitments under the Paris Agreement, the Thai government has enacted policies which envisage renewable energy accounting for the majority of grid capacity and output by 2040.

What is Thailand doing to manage grid volatility?

Thailand is currently carrying out pilot projects for the development of an advanced grid system to better manage the grid volatility that accompanies the introduction of renewable energy. The private sector is also pursuing opportunities to develop projects with battery energy storage system (BESS) technologies.

Why is energy storage important in Thailand?

Energy storage systems, including batteries and pumped hydro storage, play a pivotal role in storing excess energy from renewable sources and releasing it when needed. Thailand has been investing in renewable energy projects, such as solar and wind farms, and energy storage is essential to manage intermittent power generation.

Is energy storage a new business model in Thailand?

Energy storage is in its infancy in Thailand, and new business models are already emerging. As the regulatory framework adapts to accommodate new players in the market, we expect to see greater penetration in this area. Notes Energy Policy and Planning Office, Ministry of Energy, electricity statistics
