

The largest energy storage new energy company

Overview

Global energy storage system (ESS) shipments soared to a record 286 GWh in 2025, with industry heavyweights like Tesla and leading Chinese manufacturers such as BYD and CATL spearheading the charge. What are the world's largest battery storage projects?

The Hornsdale Power Reserve and the Victorian Big Battery are two of the largest battery storage projects in the world and were built by the French company Neoen, an independent renewable energy producer. Such projects demonstrate the promise of grid services offered by large storage solutions such as energy arbitrage and frequency control. 9.

Where will a new battery energy storage system be installed in Australia?

The new system was designed in collaboration with Private Energy Partners, a Quinbrook affiliate. It will be deployed at multiple sites across Australia. These include Brisbane's Supernode, the country's largest battery energy storage campus.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

What is a Highview solar energy storage facility?

The first is a 90 MW, 10-hour storage facility on the Katherine-Darwin network. The other one is a 30 MW, 12-hour facility near the Owen Springs Power Station outside Alice Springs. These projects integrate solar power with Highview's proprietary Liquid Air Energy Storage (LAES) technology to provide a stable, base-load renewable energy supply.
