

# The latest news on wind and solar hybrid for Tunisia solar container communication stations

## Overview

---

Which companies are building solar projects in Tunisia?

The latter companies already have a footprint in Tunisia, with Voltalia announcing plans to build a 130MW solar project in the country in May, and Scatec collaborating with Aeolus to build a 120MW project in August. The second tender calls for two projects of unspecified capacity in Hechain, Gabes governate and Khobna, Sidi Bouzid governate.

Will Tunisia install 1.7GW of new renewable power capacity?

Tunisia plans to award contracts for 1.7GW of new renewable power capacity. Image: Voltalia. Tunisia has announced the winners of tenders for over 500MW of solar capacity, part of a series of tenders to install 1.7GW of new renewable power capacity.

Can hybrid solar and wind power harvesting be a sustainable future city?

Since solar radiation and wind speed change throughout the year, neither a solar nor a wind-powered system can offer consistent electricity individually. By considering this condition, hybrid solar and wind power harvesting is suggested for sustainable Smart future cities.

What is hybrid solar-wind power harvesting system?

The most preferable and easily accessible energy sources are solar and wind. These can be combined, and a Hybrid Solar-Wind power harvesting system can be created, and it can be used in a smart city-like urban environment. This type of system provides a more reliable source of power supply to the residents.
