

The minimum number of square meters of solar roof tiles

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Are solar roof tiles right for You?

Solar roof tiles are ideal for those who want the benefits of renewable energy without the traditional look of solar panels. Benefits include, but are not limited to: Lower energy bills: Solar panels reduce reliance on grid electricity, significantly cutting monthly energy costs.

How much does a solar roof tile system cost?

To give you an idea, the average 3.5 kW solar roof tile system will cost around £13,000, compared to approximately £7,000 for a regular PV system. However, remember that you are also getting a new roof with your solar tiles, so a direct price comparison is slightly misleading. Information last updated in April 2025.

What size solar tiles do I Need?

lter and roo ates (if required) 300mm x 600mm Minimum 25mm space under batten y fall in the range 250 - 265mm Note that e tile covers two batten spaces. For 15 batten spaces/roof courses you will need 7.5 tiles - 7 iles cover 612 width Power Output As a guide our Solar Tiles output 155-180Wp/
