

The share of solar cell modules

Overview

How big is the solar cells and module market?

The overall market size for the solar cells and module market was USD 191,647.5 Million in 2025. How big is the solar cells and module market expected to be in 2035?

The solar cells and module market is expected to reach USD 402,402.1 Million in 2035. What will drive the demand for the solar cells and module market during the forecast period?

.

What is solar PV module market?

Solar PV Module Market was valued at USD 280.5 billion in 2023 and is anticipated to grow at a CAGR of over 8.2% between 2024 and 2032. It is a system that converts sunlight into electricity using photovoltaic cells. These modules are composed of multiple interconnected solar cells, typically made from silicon or other semiconductor materials.

What is the global solar cell market size?

The global solar cell market size was estimated at USD 116.1 billion in 2023 and is anticipated to reach USD 333.8 billion by 2030, growing at a CAGR of 16.4% from 2024 to 2030. The growing environmental awareness and the urgent need to reduce carbon emissions push governments and consumers towards renewable energy sources.

What are the key factors affecting the solar cells & module market?

Rising adoption of renewable energy, declining costs of solar technology, and increasing government incentives for solar power installations will drive market growth. List the top 5 countries contributing to the solar cells and module market?
