

# **Three-input single-output UPS uninterruptible power supply installation**

## Overview

---

What is a 15 kVA 3 phase uninterruptible power supply?

15 kVA 3 Phase Uninterruptible Power Supply UPS Online Type UPS-5KVA to 200KVA Dimension (W×D×H)mm: 1000×800×2260 (1or2 cabinet) Weight: 2300kg In the event of an AC power failure, the UPS will automatically transfer to battery power and continue to provide power without any interruption for the full amount of time you select.

What type of power supply is required for UPS?

UPS Under 10 kVA. The primary input power supply shall be single-phase or three-phase as required. UPS 10 kVA and Larger. Normal input power supply shall be three-phase, 480 V ac plus ground. Bypass ac source shall originate at different buses in the electrical system.

What is an uninterruptible power system (UPS)?

Uninterruptible power system (UPS) (1) An electrical system designed to provide instant, transient- free backup power during power failure or fault. Some UPSs also filter and/or regulate utility power (line conditioning). (2) A Device whose sole purpose is to save your equipment, your data and your job. User replaceable.

What is a three phase UPS system?

A three phase supply will deliver more and higher constant electrical power than a single phase power supply, making the three phase standalone UPS system an ideal choice to protect larger applications such as communication rooms, data centers and switch rooms, industrial manufacturing plants and more.
