

# **Tool Battery Charging Module**

## Overview

---

What types of battery charger modules are available?

Explore our diverse range of Battery Charger Modules designed to charge a wide variety of battery types with voltage ratings from 3.6V to 12V. Whether you're working with Li-ion, LiPo, NiMH, or other battery chemistries, we have modules tailored for safe and efficient charging.

Why should you use TI battery chargers?

Improve battery lifetime, runtime, and charge time using TI battery chargers with high power density, low quiescent current, and fast charge current. Shrink your design and overall solution size with a broad portfolio of power-dense battery charger ICs that support any input source and any charging topology (buck, buck-boost, boost and linear).

What types of batteries can a Charger support?

Chargers support the entire USB Type-C® Power Delivery spectrum (20V, 5A) and multicell battery packs. Monitors offer high-accuracy voltage measurements ( $\pm 5\text{mV}$  at  $25^\circ\text{C}$ ) capable of autonomous or host-controlled cell balancing (through I2C, Serial Peripheral Interface or High-Speed Data Queue) for three to 16 cells in series.

What are industrial power battery connectors used for?

These rugged industrial power battery connectors also find application in e-bike battery charging and other DC power distribution applications. DuraEV™ is a portable and fixed battery charging and discharging connector, ideally used for EV charging.

## Tool Battery Charging Module
