

# Transaction of a 120kW mobile energy storage container for base stations

## Overview

---

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

How do mobile energy-storage systems improve power grid security?

For more information on the journal statistics, [click here](#). Multiple requests from the same IP address are counted as one view. In the high-renewable penetrated power grid, mobile energy-storage systems (MESSs) enhance power grids' security and economic operation by using their flexible spatiotemporal energy scheduling ability.
