

Ultra-small solar water pump

Overview

What is a solar powered water pump?

Solar-powered Water Pumps: These pumps use energy from the sun to power electric pumps, which extract water from the ground. The price and technology have evolved in recent years, allowing solar-powered water pumps to be a more affordable, reliable and environmentally sustainable solution to water scarcity.

What is the smallest solar water pump?

The Waterboy 4C1261100 is a mid range 4"centrifugal solar water pump. Ideally suited for small to medium water supply requirements where higher volumes of water are required. The 4C1261100 will push out up to 57,600L /day with lift of up to 25m. The 3HR200 is Waterboy's smallest solar water pump in the range, being both economical & efficient.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.

What is a solar water pump kit?

The Solarriver Solar Water Pump Kit is perfect for large fountains, ponds, waterfalls and rainwater collection. Its solar panel comes with a stake and can be placed anywhere due to using the 16 feet long chord or even an additional 16' extension if needed.
