

Uninterruptible Power Supply BESS in Zurich Switzerland

Overview

What is an uninterruptible power supply / UPS?

An uninterruptible power supply / UPS is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails.

How many UPS & battery systems have been installed in Switzerland?

More than 30'000 UPS and battery systems have been successfully delivered, installed and are in operation at more than 3'000 clients in more than 100 countries. This success is based on traditional Swiss values that focus on technical excellence and quality in all areas of operation. We welcome you to be part of it.

Should you buy a ups or a Bess system?

UPS systems are cheaper upfront. But their batteries wear out faster and aren't designed for daily use. BESS systems are more expensive initially, but they offer long-term savings through energy arbitrage, grid incentives, and durability (especially with lithium iron phosphate batteries). Which One Should You Choose?

.

What is the difference between Bess and ups?

They use UPS for surge protection and instant switchovers and BESS to run for 8+ hours during blackouts, powered by solar. The company uses BESS to flatten peak loads and reduce utility bills by 25%, while UPS protects conveyor belts from sudden shutdowns. UPS and BESS both play critical roles, but in different ways.
