

Uninterruptible power supply ups wall mount

Overview

How does the ups Mount work?

The design of the UPS Mount allows you to mount your UPS unit to the wall or to the underside of your desk, saving much-needed space around your work area. This particular UPS Mount is compatible with certain Uninterruptible Power Supply Units, so please check below to be certain your model is listed.

Is an uninterruptible power supply necessary?

An uninterruptible power supply (UPS) is important for ensuring that your systems won't go down if the power goes out or voltage drops beneath an acceptable level. UPS systems shouldn't take up valuable desk space, so consider mounting it to the wall or under a desk instead.

What is ups Mount 143?

The UPS Mount 143 is used to mount and hold an uninterruptible power supply unit from APC or CyberPower to a wall or under a desk at your home or office.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS), also known as a battery backup, provides backup power when your regular power source fails or voltage drops to an unacceptable level. A UPS allows for the safe, orderly shutdown of a computer and connected equipment. The size and design of a UPS determine how long it will supply power.
