

Victoria Energy Storage Integrated System

Overview

Does Victoria have a battery energy storage system?

Victoria fast-tracks battery storage project for a sustainable energy future: The Victorian Government is assisting a renewable energy developer fast track its Battery Energy Storage System —now approved through the Development Facilitation Program.

What are Victoria's energy storage goals?

It is worth noting that Victoria has several energy storage targets in place, including having at least 2.6GW of capacity by 2030, with this to be increased to at least 6.3GW by 2035. Eku Energy is an energy storage development platform that was launched through the Macquarie Asset Management-owned Green Investment Group (GIG) in late 2022.

What is acenergy's battery energy storage system (BESS) project?

ACEnergy's Battery Energy Storage System (BESS) project in Little River has been fast-tracked through the Victorian Government's Development Facilitation Program, which streamlines planning approvals for major projects that deliver significant economic, social, and environmental benefits, including renewable energy facilities.

When will the rangebank battery energy storage system be fully operational?

The industrial-scale Rangebank battery energy storage system, located 50 kilometres southeast of Melbourne, Victoria, has successfully been energised and is scheduled to be fully operational by late 2024.
