Overview

What are unmanned aerial vehicles (UAVs)?

Recently, unmanned aerial vehicles (UAVs) or drones have emerged as a ubiquitous and integral part of our society. They appear in great diversity in a multiplicity of applications for economic, commercial, leisure, military, and academic purposes.

What are renewable power systems for Unmanned Aerial Vehicles (UAVs)?

This paper comprehensively reviews renewable power systems for unmanned aerial vehicles (UAVs), including batteries, fuel cells, solar photovoltaic cells, and hybrid configurations, from historical perspectives to recent advances. The study evaluates these systems regarding energy density, power output, endurance, and integration challenges.

What is a manned aircraft system (UAS)?

UAS are air vehicles and associated equipment that do not carry a human operator, but instead are remotely piloted or fly autonomously. UAS commonly are referred to as Unmanned Aerial Systems (UAS), Unmanned Aerial Vehicles (UAV), Remotely Piloted Aircraft Systems (RPAS) and drones.

What is a UAV in the military?
