

Warsaw regular portable energy storage power supply

Overview

Why do we need energy storage facilities in Warsaw?

In summary, the construction of energy storage facilities in Warsaw is a significant step towards enhancing the city's energy infrastructure, supporting the integration of RES, and ensuring a stable and secure power supply for its residents. This article was prepared by Institute of Fluid-Flow Machinery Polish Academy of Sciences.

Will Warsaw benefit from the construction of ten electricity storage facilities?

Warsaw is going to benefit from the construction of ten electricity storage facilities, thanks to a funding boost of over PLN 12 million from the National Fund for Environmental Protection and Water Management (NFOŚiGW).

How can energy storage support Poland's electricity system?

By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system. The storage support program is expected to begin accepting applications in the second quarter of 2025. Full details and deadlines will be published by the NFOŚiGW.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).
