Overview

What is uninterruptible power supply system?

Uninterruptible power supply system is provided for consumers supply with uninterruptible DC and AC. Uninterruptible power supply system consists of: matching transformers. Uninterruptible power supply system generates input and output three-phase line voltages 220, 380 V AC to power range from 15 up to 60 kVA according to Customer's request.

Why should you choose cover uninterruptible power supply?

Tested UPS design, redundancy of critical parts, communication solutions and confidence in the batteries used, allow for building reliable power systems which ensure safety for many years. Cover Uninterruptible Power Supply are present on the European market since 1995, when Swiss Cover-Energy launched the brand and product line.

What are IPS UPS systems?

The IPS UPS systems offer reliable power supply solutions with capacities up to 10 kVA, designed for integration with IT systems, networks, automation, monitoring, lighting, and various machines. ENELION VERTICA offers innovative electric vehicle charging solutions, making it ideal for locations without wall-mounted chargers.
