

Water plant uses South Tarawa photovoltaic folding container low-pressure type

Overview

What is the South Tarawa water supply project?

The Green Climate Fund, in partnership with the government of Kiribati, the Asian Development Fund, the World Bank and the Global Environment Facility, is enabling the implementation of the South Tarawa Water Supply Project, involving the construction of two desalination plants and a solar PV system to augment Kiribati's water supplies.

How many desalination plants are there in South Tarawa?

Construction of the project's 2 desalination plants, at Betio and McKenzie, is complete. Commissioning of the McKenzie plant is ongoing, and the plant is expected to commence delivering water to the residents of South Tarawa before the end of Q4 2024.

Why is alternative water supply important in Kiribati?

Against this background, the development of alternative sources of water supply is important and urgent to ensure water security in the country and boost resilience against the effects of climate change. The Kiribati Public Utilities Board (PUB) is responsible for the provision of water to the people of south Tarawa.
