

Wellington PV Container BESS Information

Overview

What is the Wellington Battery energy storage system (BESS)?

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW. AMPYR Australia, a renewable energy assets developer in the country, owns 100% of the BESS project.

What is the Wellington Bess project?

“The Wellington BESS will contribute towards supporting Australia’s journey towards a more sustainable and reliable energy future,” said RJE Global in a statement. The project sits within the Dubbo Regional Council LGA and is part of broader efforts to boost storage infrastructure as renewable penetration increases across the NEM.

What is the Wellington Battery energy storage system?

The Wellington Battery Energy Storage System (BESS) will store excess renewable energy ready for use by homes and businesses during peak times. BESS projects play an important role in the future electricity system. Construction of the project will be undertaken by AMPYR’s preferred construction contractors Fluence and RJE Global.

What is the Wellington Stage 1 Bess?

“Supported by our high-calibre partners, ZEN Energy and Fluence, the Wellington Stage 1 BESS will play a critical role in an increasingly renewable grid whilst boosting Australia’s energy storage capacity and supporting the delivery of low-cost energy to major users.”
