

Where are the wind and solar complementary base stations in Cote d Ivoire

Overview

Where is solar energy available in Côte d'Ivoire?

Côte d'Ivoire has several areas with great solar energy potential, with the highest DNI solar intensity reaching 5.7 kWh/m² per day recorded in the northwest part of country, between Denguele and Savanes districts. The strongest wind speeds of 4.0-5.0 m/s at 50 m are distributed in southern part of country, along coastline of the Gulf of Guinea.

Why should Côte d'Ivoire invest in a solar power plant?

The solar power plant is regarded as a model project for the expansion of solar energy in Côte d'Ivoire. It is an important contribution to the fight against climate change and a decisive step towards increasing the share of renewable energies in the country's electricity supply to 45% by 2030.

Does Côte d'Ivoire have hydropower?

As of 2023, hydropower in Côte d'Ivoire accounted for about 30% of electricity generation. Although periods of severe drought sometimes lead to interruptions in supply, the realization of untapped hydropotential could be a cornerstone for the development of the energy sector. Table 2. Renewable energy resources of Côte d'Ivoire.

How many service stations are there in Côte d'Ivoire?

In Côte d'Ivoire, we have a network of nearly 190 service stations, where we retail our fuel and products, and offer related services. In our service stations, we also sell distributed solar solutions to low-income communities. Join Us!
