Robust design that stands up to heat and harsh weather conditions Reliable, environmentally friendly, and efficient

How many inverters does a solar power station have?

Equipped with everything necessary This power station is supplied totally equipped with several high-efficiency PV inverters, the LV/MV transformer, MV switchgear and LV switchgear. It can be equipped with up to two dual inverters, in both 1,000Vdc and 1,500Vdc topologies, so it covers a very wide output power range.

What is MV-inverter station?

highlight of this chain is the MV-inverter station, which comprises the switchgear, transformer, and inverter. With its broad portfolio of switchgear, Siemens offers the right solution for any application – reliable and maintenance-free, for any climate.

Which switchgear is right for your PV system?

With its broad portfolio of switchgear, Siemens offers the right solution for any application – reliable and maintenance-free, for any climate. Their outdoor housing allows these switchgear to be installed in PV systems with no additional station enclosure. The state-of-the-art inverters can be operated at DC input voltages of up to 1,500 volts.
