

Which company in Madrid has the most solar sites

Overview

Does Spain need solar power?

The Madrid region has the highest energy consumption in Spain. So, the demand for solar power is therefore huge. Swiss project developer Edisun Power Europe is now developing three large solar parks near the capital, with almost one gigawatt of solar power.

Does Spain have a solar market?

Spain is rapidly transitioning to renewable energy sources, with solar power serving as the focal point of this transition. Spain presents a prospective market for solar companies due to its government's support for renewable technologies and the abundance of sunshine.

What is the demand for solar power in Spain?

The three projects have grid access, connection rights granted, an environmental licence (DIA) and an interim administrative permit (AAP). The Madrid region has the highest energy consumption in Spain. So, the demand for solar power is therefore huge.

Where is solar power based in Spain?

The company currently operates 2.4GW of solar capacity, predominantly in southern Spain where solar resources are most abundant. Their integrated approach combines solar generation with storage solutions and smart grid technologies, creating more reliable and valuable renewable assets.
