

Which energy storage power supply should I choose in Serbia

Overview

How much power does Serbia use?

Installed capacity of hydropower is 2,835 MW and as of December 2019 wind power capacity is 500 MW. Serbia also makes use of geothermal and solar energy, currently [when?

] 27% of Serbia's electricity comes from hydro while 4% comes from other renewables.

What type of energy is used in Serbia?

Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. In 2021 Serbia's total energy supply was almost 700 PJ, with the energy mix comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

How much solar power does Serbia have?

Serbia's total 11 MW of installed solar capacity (5.34 MW from land installations and 3,476 MW from roof installations in a total of 107 projects) is negligible. According to the International Renewable Energy Agency (IRENA) Serbia has an estimated potential of 3.6 GW. Currently, Serbia's installed and utilized wind-power capacity is below 500 MW.

What percentage of Serbia's electricity comes from coal?

Serbia's national power utility Electric Power of Serbia (EPS) produces nearly 70 percent of the country's electricity from coal and nearly 27% percent from hydropower, with approximately 4% coming from private developers in wind and solar energy. Serbia heavily subsidizes coal and electricity prices, inhibiting competition.

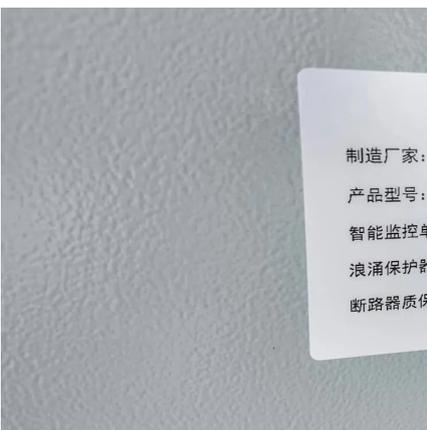

Which energy storage power supply should I choose in Serbia

Serbia receives first two grid applications for battery energy storage

Feb 27, 2025 · Batteries stabilize the power grid and enable the storage of excess energy and its use in times of higher consumption or lower production. In his words, batteries increase ...
