

# Wind Solar Energy Storage UHV

## Overview

---

What is China's first 'wind-solar-thermal-storage integration' project?

(Photo by Xu Ke/People's Daily Online) China's first "wind-solar-thermal-storage integration" ultra-high voltage (UHV) project, the Longdong-Shandong  $\pm 800$  kilovolt direct current (DC) transmission project, was put into operation on May 8.

What is the new UHV line?

The new UHV line will enable the stable transmission of over 10 million kilowatts of renewable power, facilitating the coordinated flow of energy across regions. At the heart of the project is a vast energy base run by China Huaneng Group, a major state-owned power company.

Can a cascade hydro-wind-solar-pumped storage hybrid system mitigate uncertainties of wind and solar power?

Zhou et al. proposed a capacity configuration method for a cascade hydro-wind-solar-pumped storage hybrid system, in which a scenario-based optimization approach was used to mitigate the uncertainties of wind and solar power.

Can wind power and photovoltaic power be integrated into the grid?

However, the integration of wind power (WP) and photovoltaic (PV) into the grid poses challenges in balancing generation with hydropower flexibility to ensure stable and efficient power systems .
